Funding provided by the Pennsylvania Department of Agriculture Specialty Crop Block Grant, agreement number ME 44123778, Understanding Peach Purchasing Behavior and Preferences

## Penn State Extension

Our overall goal

- To understand factors effecting fresh and value-added peach purchases and identify barriers that prevent consumers from purchasing the amount they desire.

## Penn State Extension

## Data collection

- Focus group session conducted April 10, 2013
- Internet survey, June 19-25, 2013
- Sensory evaluation, August 7, 2013

## Penn State Extension

15 minute Internet survey (19-25 June 2013)

- 1,093 mid-Atlantic residents completed the survey. Screener criteria included:
- Age 18 and older
- Not a member of the tree fruit industry or trade (e.g. retailer, distributor, peach grower)
- Responsible for at least half of the grocery shopping for the household
- Purchased and ate fresh peaches during the months of July through September

## Penn State Extension

## Average fresh peach purchasing frequency

$\square$ Daily to a few times a
 week

■ About once a week

- Two to three times a month
- About once a month
$\square$ At leaste once during the months of July through September
72.1\% of participants responded that fresh peaches are a planned purchase

## Penn State Extension

## How consumers use peaches they purchase

## Purpose

Percent (\%)
To eat fresh
98.3

Use as an ingredient in recipes and/or 36.3 to bake with

Freeze for later use
Can in jars for later use
7.4

## Penn State Extension

What would encourage consumers to purchase more fresh peaches than they typically do

- Three to four peaches are prepackaged (22.8\%)
- Six to eight peaches are prepackaged (23.8\%)
- Nutritional value is stated ( $27.4 \%$ increase)
- Storage information is present (35.3\%)
- Information on how long peaches can be stored is present (40.0\%)
- Family member or friend suggested the particular peach (41.6\%)

## Penn State Extension

## Appealing peach characteristics

- Type of peach
- Freestone variety appealed to $45.1 \%$ of participants
- Clingstone variety 16.0\%
- No preference 38.9\%
- Peaches size
- 2.5 inches and larger in diameter appealed to 45.5\%
- Peaches smaller than 2.5 inches appealed to 19.4\%
- No preference 35.1\%
- Peaches that are slightly soft (65.3\%)
- Peaches that are sweet (88.6\%)

## Penn State Extension

## Appealing peach characteristics: Peel color preference

No peel color preference: 31.9\% of participants

## Penn State Extension

## Processed product purchasing \& interest

| Product | Have purchased <br> $(\%)$ | Interested in <br> purchasing (\%) |
| :--- | :---: | :---: |
| Canned or jarred peaches or slices | 83.9 | 85.8 |
| Non-alcoholic peach beverages (juice, tea, etc.) | 63.0 | 76.0 |
| Ready to eat snacks (dried peach slices, peach <br> chips, etc.) | 60.9 | 78.0 |
| Preserves, jellies, jams, or butters | 56.2 | 76.0 |
| Ice cream or other frozen desserts | 56.0 | 78.0 |
| Pastries, cakes, or other bakery items | 55.3 | 77.3 |
| Oatmeal, toaster pastries, cereal, other breakfast <br> foods | 43.4 | 64.4 |
| Smoothies and smoothie mixes | 39.7 | 72.0 |
| Alcoholic beverage (wine, brandy, hard cider, <br> etc.) | 38.4 | 56.1 |

## Penn State Extension

Sensory evaluation

- Two hour session
- 100 prescreened participants
- Evaluations took place in the Sensory Evaluation Center on the University Park Campus of The Pennsylvania State University
- Individual booths under normal white lighting

## Penn State Extension

## Sensory evaluation

- Four peach samples were evaluated for liking/disliking on several attributes
- Attributes: color, texture, sweetness, sourness, flavor, and overall

## Penn State Extension

## Brix and TA results

| Peach Type | Brix | Titratable Acidity <br> $(\mathrm{g} / \mathrm{L}$ malic acid) |
| :---: | :---: | :---: |
| Redhaven <br> (Picked 7/31/13) | 7.1 | 1.64 |
| Raritan Rose <br> (Picked 8/5/13) | 10.0 | 5.40 |
| PF Lucky <br> (Picked 7/31/13) | 11.9 | 6.71 |
| Blazingstar <br> (Picked 8/5/13) | 9.0 | 2.77 |

## Penn State Extension

## Sensory evaluation

- Peaches pitted, peeled and cubed
- Participants given the same amount of each sample
- Presented in a balanced randomized design
- Labeled with a 3-digit blinding code
- Compusense Five Software used for ballot presentation and
 analyses

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked 7/31/13) | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 b^{2}$ | $4.05 c$ | 7.77 a | 6.70 b |

[^0]-PF Lucky received a significantly higher score than the other samples (mean of 7.77), which fell between 'like very much' and 'like moderately.'
-Redhaven (7.07) fell close to 'like moderately.'

- Blazingstar (6.70) fell between 'like slightly' and 'like moderately.'
-Raritan Rose (4.05) fell close to 'dislike slightly.'

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked <br> $7 / 31 / 13$ ) | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 b^{2}$ | 4.05 c | 7.77 a | 6.70 b |
| Texture | 6.89 b | 5.72 c | 7.64 a | 3.80 d |

-All four samples were significantly different from each other. -PF Lucky received a significantly higher score than the other samples (mean of 7.64), which fell between 'like very much' and 'like moderately.'
-Redhaven (6.89) fell between 'like moderately' and 'like slightly.'

- Raritan Rose (5.72) fell between 'like slightly' and 'neither like nor dislike.'
-Blazing star (3.80) fell between 'dislike slightly' and 'dislike moderately.'

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked <br> $7 / 31 / 13)$ | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 b^{2}$ | 4.05 c | 7.77 a | 6.70 b |
| Texture | 6.89 b | 5.72 c | 7.64 a | 3.80 d |
| Sweetness | 6.09 b | 4.74 c | 7.01 a | 4.60 c |

-PF Lucky received a significantly higher score than the other samples (mean of 7.01), which fell near 'like moderately.'
-Redhaven (6.09) fell near 'like slightly.'
-Raritan Rose (4.74) fell near 'neither like nor dislike.'

- Blazing Star (4.60) was not significantly different from Raritan Rose.

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked <br> $7 / 31 / 13$ ) | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 b^{2}$ | 4.05 c | 7.77 a | 6.70 b |
| Texture | 6.89 b | 5.72 c | 7.64 a | 3.80 d |
| Sweetness | 6.09 b | 4.74 c | 7.01 a | 4.60 c |
| Tartness | 5.98 b | 4.92 c | 6.68 a | 5.03 c |

- In relation to tartness, PF Lucky received a significantly higher score (6.68) compared to the other samples. This rating falls between like moderately' and 'like slightly.'
-Blazingstar (mean of 5.03 ) and Raritan Rose (4.92) were not significantly different from each other. Both samples fell near 'neither like nor dislike.' Redhaven (5.98) fell near 'like slightly.'

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked <br> $7 / 31 / 13)$ | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 b^{2}$ | 4.05 c | 7.77 a | 6.70 b |
| Texture | 6.89 b | 5.72 c | 7.64 a | 3.80 d |
| Sweetness | 6.09 b | 4.74 c | 7.01 a | 4.60 c |
| Tartness | 5.98 b | 4.92 c | 6.68 a | 5.03 c |
| Flavor | 6.56 b | 5.18 c | 7.38 a | 5.02 c |

-PF Lucky received a significantly higher score than the other samples (mean of 7.38), which fell between 'like very much' and 'like moderately.'
-Redhaven (6.56) fell between 'like moderately' and 'like slightly.'
-Raritan Rose (5.18) fell between 'neither like nor dislike' and 'like slightly.' Raritan Rose was not significantly different from Blazingstar (5.02) in terms of flavor.

## Penn State Extension

## Sensory evaluation-results

| Attribute | Redhaven <br> (Picked 7/31/13) | Raritan Rose <br> (Picked 8/5/13) | PF Lucky <br> (Picked <br> $7 / 31 / 13)$ | Blazingstar <br> (Picked 8/5/13) |
| :---: | :---: | :---: | :---: | :---: |
| Color $^{1}$ | $7.07 \mathrm{~b}^{2}$ | 4.05 c | 7.77 a | 6.70 b |
| Texture | 6.89 b | 5.72 c | 7.64 a | 3.80 d |
| Sweetness | 6.09 b | 4.74 c | 7.01 a | 4.60 c |
| Tartness | 5.98 b | 4.92 c | 6.68 a | 5.03 c |
| Flavor | 6.56 b | 5.18 c | 7.38 a | 5.02 c |
| Overall | 6.56 b | 5.02 c | 7.43 a | 4.81 c |

-In terms of overall liking, PF Lucky received a significantly higher score than the other samples (mean of 7.43), which fell between 'like moderately' to 'like very much' compared to the other samples.
-Redhaven (6.56) fell between 'like slightly' and 'like moderately.'
-Raritan Rose (5.02) fell close to 'neither like nor dislike.'
-Blazingstar (4.81) fell between 'neither like nor dislike' and 'dislike slightly.'

[^0]:    ${ }^{1}$ A 9 -point hedonic scale was used for evaluating liking with $9=$ like extremely, $8=$ like very much, $7=$ like moderately, $6=$ like slightly, $5=$ neither like nor dislike, $4=$ dislike slightly, $3=$ dislike moderately, $2=$ dislike very much, $1=$ dislike extremely.
    ${ }^{2}$ Means with different letters within rows are significantly different $\alpha=0.05$. Significance was determined using ANOVA followed by Tukey's HSD in Compusense ${ }^{\circledR}$ five software.
